

Activity picking up at Willogoleche

Construction activity at the Willogoleche Wind Farm is increasing.

The site compound has been established, roads are being built and hardstands for the turbines are taking shape.

In the coming weeks, cabling works will begin to

connect the adjacent substation to the wind farm.

As the cables must cross Willalo Road, it will be temporarily closed as needed. Appropriate signage will be displayed.

Questions can be directed to project manager Pieter Jagers on 0428 110 933, or via email at Pieter.Jagers@au.engie.com.
