

**IPM Operation & Maintenance Loy Yang Pty Ltd
Loy Yang B Power Station**

LYB.POL.02 - Environmental Policy

IPM Operation & Maintenance Loy Yang Pty Ltd (the Company) operates and maintains the 1,000 MW brown coal fired station, Loy Yang B Power Station.

The Company recognises the importance of utilising and continuing to improve our compliance position with the ENGIE Operational Excellence framework which includes elements of Environmental management.

LYB is dedicated to the protection of the environment and supports practices that prevent pollution and consistently operates within its environmental licence conditions.

The Company believes that sound environmental performance contributes to its competitive strength, and benefits its customers and employees and the wider community. Company personnel continually strive to improve station efficiency and to responsibly manage the Company's electricity generation operations to manage and minimise its impact on the environment.

Significant environmental regulatory reform is anticipated in the short to medium term that will require diligent review of our key impacts– air/greenhouse emissions, disposal of drainage, ash and saline water and our consumption of natural resources.

To achieve these aims and considering the current circumstances, the Company is committed to:

- Conducting all operations in accordance with the relevant environmental legislation, regulations, obligations, agreements and licences which relate to the Power Station operations and identified environmental aspects and impacts.
- Maintaining and demonstrating compliance to an Environmental Management System certified to AS/NZS ISO 14001 and ensure effective integration with the AS/NZS ISO 9001 Quality Management System.
- Continually improving both the effectiveness of the Environmental Management System to enhance Environmental Performance through the setting and reviewing of Environmental Objectives and Targets within the Business Plan and the annual Environment Improvement Plan.
