Hazelwood Project Community Consultation

The Hazelwood Project has moved into the second phase of decommissioning activities in the Power Station and Mine.

Community consultation and engagement remains a critical part of the overall project so key management will again provide the community with an update at a meeting in Morwell next week.

Project Director, Tony Innocenzi, said engagement activities would now change focus as the project advanced.

“We recognise and acknowledge that the community wants to have a say about what might be next for the Hazelwood site,” Mr Innocenzi said. “To reflect this, our engagement activities will now change focus as we seek out your thoughts, comments and suggestions.

“We want to hear your concerns and your ideas as Hazelwood offers an array of opportunities for the local community and broader Latrobe Valley.”

Next week’s engagement session will be in a different format to previous information meetings.

Participants can join a round-table discussion with senior managers. The topics for discussion will include: Mine must be made safe, stable and sustainable; fire readiness a high priority; hazardous materials identified; and Station cleaned and made safe.

The session will be held from 5.30-7pm on Wednesday 20 September at the Italian Australian Club, 499-501 Princes Drive Morwell.

Please RSVP to ENGIE External Communications Manager in the Latrobe Valley, Lauren Carey, on 5135 5000 or email corporateaffairs@au.engie.com
