HAZELWOOD POWER STATION & MINE

ENGIE

COMMUNITY CONSULTATION UPDATE

ENGIE Hazelwood is committed to providing as many opportunities as possible for our community to join us in the conversation around the rehabilitation and remediation of the former Hazelwood Power Station and Mine. We value your input and feedback into our project which is arguably the largest currently being undertaken in Australia.

This, together with our guiding objectives, will assist in forming the development of a masterplan for conceptual rehabilitation of both the Mine and Power Station site.

We encourage you to keep up to date with what is happening at Hazelwood by going to our website.
