# Mine Rehabilitation Earthworks recommence

---

Earthworks have recommenced at the Hazelwood Rehabilitation Project.

These activities are expected to be carried out from now until late April 2019 as part of ongoing Mine rehabilitation works and will see an increase of truck movements onsite, which may result in dust.

A range of initiatives to mitigate dust emissions from the site are in place.

For more information and to learn more about the Project's range of dust mitigation initiatives contact 5135 5000.
