

# ENGIE in Australia

## A major force on the Australian energy scene

ENGIE is one of the largest private generators of electricity in the country, with a diverse mix of assets including renewable, gas-fired and brown coal-fired generating plant in Victoria, South Australia and Western Australia.

The company supplies 12 per cent of Australia's National Energy Market and has an installed generating capacity of more than 3,550 MW (gross). Its retail business, Simply Energy, is one of Australia's fastest growing energy retailers with more than 550,000 electricity and gas accounts in Victoria, South Australia, New South Wales and Queensland.

*Pelican Point power station*

Since establishing its Australian presence in 1996, ENGIE has invested more than \$5 billion and played a leading role in a range of innovative energy projects across the country, including:

- Development and construction of South Australia's first major private sector power station at Pelican Point, north of Adelaide. The \$420 million, 479 MW gas-fired combined cycle power station is one of Australia's most advanced and efficient generating plants;
- Construction of the \$500 million SEA Gas pipeline; and
- Development of the \$92.5 million Canunda Wind Farm at Lake Bonney in South Australia in 2005.

ENGIE will continue to pursue new investment opportunities in base load, peaking plant and renewable energy.

ENGIE

## A leading global company

ENGIE is a global energy player and an expert operator in the businesses of electricity, natural gas and energy services.

The Group supports changes in society that are based as much on economic growth as on social progress and the preservation of natural resources.

ENGIE develops its businesses (power, natural gas, energy services) on a model based on responsible growth to take on the major challenges of energy's transition to a low-carbon economy; access to sustainable energy; climate change mitigation and adaptation; and the rational use of resources.

The Group provides individuals, cities and businesses with highly efficient and innovative solutions, largely based on its expertise in four key sectors: renewable energy, energy efficiency, liquefied natural gas and digital technology.

ENGIE employs 154,900 people worldwide and achieved revenues of €69.9 billion in 2015.

The Group is listed on the Paris and Brussels stock exchanges (ENGI) and is represented in the main international indices: CAC 40, BEL 20, DJ Euro Stoxx 50, Euronext 100, FTSE Eurotop 100, MSCI Europe, DJSI Europe and Euronext Vigeo (World 120, Eurozone 120, Europe 120 and France 20).

ENGIE has a strong presence in its markets with 115.3 GW of installed power-production capacity - 19 GW of which is installed power-production capacity in renewable energy - and 10.5 GW of capacity under construction as at 31 July 2015.

## Committed to a sustainable future

ENGIE recognises its responsibilities and the important role it plays in protecting the environment today and helping ensure a sustainable future.

Its environmental performance is reviewed alongside financial and engineering performance. It is also exploring new business opportunities in additional renewable energy projects.

Since 1997, the company has enjoyed a significant partnership with Landcare, pioneered by Loy Yang B. This partnership has resulted in the planting of more than 1.5 million native trees, shrubs and grasses planted throughout Gippsland in Victoria and in South Australia and Western Australia, and has led to a new national partnership direction in the form of the Landcare Environmental Detectives Program, aiding teachers in meeting the needs of the national curriculum.

Similar initiatives meeting national curriculum standards for science subjects are provided via our Mobile Science Educations sessions for students from grade 3 to tertiary level, held at Loy Yang B and Pelican Point power stations.

The company also provides funding and support to education programs and community and sporting organisations in the communities in which it operates.
