

Details Feed-In Electricity

South East Queensland (SEQ): Solar Bonus Scheme feed-in tariff (regulated feed-in tariff)

The SEQ Solar Bonus Scheme feed-in tariff is not available to new applicants.

Eligibility

The SEQ Solar Bonus Scheme feed-in tariff will only apply to you if:

- your premises is already assigned by your distributor to the SEQ Solar Bonus Scheme;
- you are a qualifying customer; and
- your generation facility is a qualifying generator.
 - You are a qualifying customer if the annual consumption at your Premises is, or is estimated by your distributor to be, less than 100MWh.
 - A generation facility is a qualifying generator if:
 - it is a photovoltaic system with a total rated inverter capacity up to the amount prescribed under the applicable regulations or, if no amount is prescribed, 5 kilowatts;
 - is installed at your premises in a way that allows electricity generated by the generator to be first used by you and, if not used by you, supplied to the electricity grid; and
 - complies with any safety or technical requirements prescribed under the applicable regulations.

If at any time you're no longer entitled to a regulated feed-in tariff for your feed-in electricity, whether because you cease to be eligible or the relevant scheme ends or otherwise, then we will instead credit you with a voluntary feed-in tariff no less than the voluntary feed-in tariffs included in offers for feed-in electricity we are making in the market at that time.

Feed-In Tariff Rates

If you are eligible for the SEQ Solar Bonus Scheme feed-in tariff:

- for each kilowatt hour of electricity you generate and export back to the electricity grid, we'll credit you \$0.44 per kilowatt hour (GST if applicable); and
- your feed-in electricity credits will appear on your electricity bill.

Additional terms

Your Agreement sets out additional terms of our feed-in arrangement with you.
