 Original Page Format - A4 Landscape
 Photomontage PM6 is illustrated at a view angle of around 120 degrees which is within the central, binocular field, of human vision.

Photomontage limitations
 A photomontage can never show exactly what the wind farm will look like in reality due to factors such as different lighting, weather and seasonal conditions which vary through time and the resolution of the image. Also a static image cannot convey turbine movement.

The images provided give a reasonable impression of the scale of the turbines and the distance to the turbines, but can never be 100% accurate.
 The viewpoints illustrated are representative of views in this location, but cannot represent visibility at all locations.

Photomontage PM6 - Existing 120 degree field of view north east to south south east from North Bluff Road. Approximate distance to closest wind turbine 5.4km

Photomontage PM6 - Existing detail 40 degree field of view
